

## **Slap Passion v.1.1** is tube bass preamp.

**Input** section is a Clean Tube style bass model.

**Bass – Mid – Hi** are 12dB range per each. So (ex) Bass -6dB to 0 to 6dB

**Freq** is Mid Freq selection, 175Hz - 350Hz – 525Hz - 700Hz – 875Hz - 1050Hz.

**Volume** is just the matter of controlling signal.

Default MIDI CC:

1. On Of Button
2. Clean Knob
3. Bass Knob
4. Mid Knob
5. Hi Knob
6. Volume Knob

### **Note:**

Avoid Peak as possible, from your signal input to output signal of the plugin and TRUST YOUR EAR.

All the Default setting is the recommended starting point of the sound. Turn down your audio system volume to prevent any damage.

And ALWAYS REMEMBER, this is a BASS GUITAR PREAMP with no CABINET MODEL!

**THE BEST OF IT → SLAP PASSION V.1.1 is totally free! Do not SHARE the plugin without this documentation/manual and Do not RESKIN/SELL the plugin. I would be appreciate if you give comment, critic and suggestions.**

Big thanks to Christian Budde Analyzer, any digital recording forum, literature on internet and people who direct and indirect help me!
