TimeVerb

Plugin description

When you need an easy and good sounding studio reverb and you don't want to deal with tons of parameters, here comes ***TimeVerb***! Five knobs for all your easy reverberation needs.

TimeVerb is a simple digital stereo studio reverb effect.

Features:

- Very easy to use
- Very light on CPU and memory
- Easy MIDI Learn feature

This is exactly the same reverb algorithm used in **ElectricGrand EG70**, check it out on www.soundfonts.it

System Requirements and Installation

TimeVerb is a VST plugin for Mac OSX and needs a VST host program to be run. Unpack the bundle file "TimeVerb.vst" to the folder /Library/Audio/Plug-Ins/VST/ and let your host scan for new plugins.

Minimum computer configuration required:

- An Intel Mac with OSX; a processor @ 500 Mhz with 128 Mb of RAM and 1 Mb of free disk space.

License

TimeVerb is FREEWARE. It's supplied "AS IS", there is no warranty and no technical support. You can use it in your commercial music projects without limitations, redistribute it under any form (web, magazine...) at NO charge provided the original archive is not altered. **It is fully functional under all of its aspects and no limitations of any kind are applied.** The author may not be held responsible for whatever may result as a consequence of its usage.
