3 SOUND SETS
OF VOCODED VOICES

V-KODER - sample based vst

Thanks for downloading V-Koder!

I hope you enjoy it and use it in your productions!
V-Koder is a free sample based synth instrument, originally recorded, designed
and edited by DCSI (Diego Callegari),
giving you 3 vocoded - nonsense speech - voices .

The samples included in this vst are spread in 3 octaves and available as follows:

1) V-ALLMANS-KODER
2) V-UA-KODER
3) V-IGNE-KODER

To chose a group click on the " select : " area in the vst gui.
The modwheel in your midi controller add a pan lfo effect.
The instrument comes with velocity sensitivity and is available in 32 or 64 bit version,
depending on your download choice.
Experiment using it as a digital voice instrument, a short pad or a synth lead
in your own track!
The interface is pretty intuitive but for simplifying purpose here's a short description
of the 4 available parameters:

GAIN KNOB: to adjust the volume
ATTACK KNOB: to adjust the attack of the sample groups.
RELEASE KNOB: to adjust the release of the samples groups.
REVERB KNOB: to adjust the amount of reverb effect available in this instrument.

This is a simplified vst version of the V-KODER Kontakt Instrument
available for free as well on the DCSI website.
